Projects

SQRA – NO PROXY (APRIL 2018)

A smart QR attendance system which reduces the effort of the teachers to mark the attendance of the students. A QR code is generated via app which is then given to the students to scan & fill their roll number in and it doesn't allow any proxies.

Bit Math (JAN 2018)

Worked with animations and interactive layouts, concepts of probability are applied to generate random numbers with increasing difficulty

Expense Manager App (JULY 2017)

It is tough to keep track of expenses on a trip. Expense Manager is an app which helps to keep record of expenses during a trip, and also, shows balance from allocated budget. We can add, update or delete expenses. It saves our time and money by keeping a clean and accurate record of it.

Other Important Projects are:

Student Result System.
Home Automation system (IoT).
Bluetooth Printing.
FIFA Player Selling system.

All of the Projects are available on GitHub
